

Code notes

No custom Python notebook, Python script, or Google Apps Script was used for this assessment.

The analysis was performed using:

- Google Sheets
- Looker Studio

Activities performed:

- Data cleaning
- Data analysis
- Dashboard creation
- Business recommendations

Example Google Sheets Function Used

Loan Size Categorization

=IF(K2<200000,"Small",IF(K2<500000,"Medium","Large"))

Purpose:

This formula categorizes loans into:

- Small (< 200,000)
- Medium (200,000–499,999)
- Large ($\geq$ 500,000)

This was used to segment borrowers based on loan amount for analysis.
